Comfort Plus Nitrile Powder-Free

This Comfort Plus Nitrile Powder-Free is designed to let you forget you are wearing gloves. While other products might feel like a second skin, this technical marvel provides the feeling of having barely anything on the hand, while still achieving all performance requirements for medical device applications. This enhances the tactile sensitivity to the level of mimicking bare hands. With our technology and research, we created this thin film of nitrile that give reliable protection suitable for any superficial medical examination, food preparing or protection against short term contacts in laboratories. This product provides the most efficient use of resources, decreasing the waste of material per piece to an absolute minimum. With its improved design and related wall thickness, the product remains soft and flexible, although reaching examination gloves tensile strength performances for American and European standards. This solution provides the current state of the art of glove designing and combines decades of experience with the hunt for innovation.

**STGT Gloves are produce with
100% Sustainable biomass energy**

The gloves were tested against 29 chemotherapy drugs according to ASTM D6978, which presently is the most stringent test method for protective gloves against chemical permeation.

No permeation against Fentanyl drugs
No permeation up to 240 minutes when the gloves were tested in accordance to ASTM D6978.

「Touch Of Life™」

COMPLIES TO

ASTM D6319		EN 455	
Length:	Min 220mm (XS-S), Min 230mm (M-XL)	Length:	Median ≥ 240mm
Single Wall Thickness (Finger):	Min 0.05mm	Single Wall Thickness (Finger):	-
Elongation: (Before/After Aging):	Before 500%/ After 400%	Elongation: (Before/After Aging):	-
Tensile Strength (Before/After Aging):	Before Min 14Mpa/ After Min 14Mpa	Force At Break (Before/After Aging):	Before Median ≥ 6N/ After Median ≥ 6N

*For other standards please contact us

Used for

HOSPITAL

DENTAL

LABORATORY

CLEANING

INDUSTRY

HOTEL

COSMETIC

FOOD

“2nd Skin”

Micro texture at fingertip
precise grip

Single wall thickness (finger)
typical value 3.1 mil (0.08 mm)

Great comfort
& flexibility

Latex protein free

Powder free

Efficient and easy donning

Great protection against viral
penetration and chemical permeation

MDD CLASS 1 

240 mm length (median)

PPE CAT III  2777 

 Food contact compliance

PPE CAT I  

Average weight 3.0±0.2g for size M

Sustainability Certificates

amfori  BSCI
Trade with purpose

ecovadis

Factory Certificates
